WORK EXPERIENCE

TRUIST Bank - Data Analyst

2023 – current

Texas

- Developed interactive dashboards using Tableau to visualize key performance indicators (KPIs) related to customer transaction trends, improving reporting efficiency by 15%.
- Utilized SQL to extract and analyze large datasets from Oracle databases, supporting risk management and fraud detection initiatives.
- Performed profitability analysis on Truist's retail banking products, providing data-driven recommendations for pricing and marketing strategies.
- Automated monthly regulatory reporting processes, ensuring compliance with CCAR requirements and reducing manual effort by 20%.
- Collaborated with cross-functional teams to analyze customer segmentation data, enhancing targeted marketing campaigns and improving customer retention.

Toyota - Data Analyst

2019 – 2021

India

- Analyzed vehicle sales and customer feedback data to identify trends and provide actionable insights for optimizing marketing campaigns and product development strategies at Toyota India.
- Developed and maintained interactive dashboards using Power BI to track key performance indicators (KPIs) related to supply chain efficiency and inventory management, reducing reporting time by 20%.
- Performed statistical analysis on production line data to identify bottlenecks and improve manufacturing efficiency, contributing to a 10% reduction in production downtime.
- Led cross-functional teams in analyzing customer demographics, driving a 15% increase in targeted sales strategies for Toyota India's regional markets.

BRIO Technologies - SQL Data Analyst

2017 – 2019

India

- Developed complex SQL queries to extract and transform data from multiple relational databases, creating consolidated datasets for business intelligence reporting.
- Optimized SQL query performance, resulting in a 30% reduction in data retrieval time and improved dashboard loading speeds.
- Developed SQL stored procedures to automate data processing, enhancing efficiency by 30% and ensuring data integrity.
- Utilized SQL to perform in-depth data analysis, identifying anomalies and trends that led to actionable business insights and process improvements.
- Created and maintained SQL scripts for data validation and quality control, ensuring accurate and reliable data for downstream analysis and reporting.
